THE PROBLEM

Landlords Risk Everything. Every. Lease.

Every residential lease is an unsecured credit risk. When a tenant defaults, the landlord absorbs months of unpaid rent, thousands in legal costs, and endless stress — with no safety net and zero recourse.

OUR SOLUTION

RentGuard: The Rent Guarantee Layer.

RentGuard is a B2B2C platform providing rent default guarantees to residential property owners. We underwrite tenants before lease signing, and if they default, we pay — rent + lawyers + courts — until the property is recovered.

**Unpaid Rent, Fully Covered**

We pay every dollar of rent owed during the eviction process. No caps, no deductibles.

**48-Hour AI Underwriting**

Instant decisions in most cases. Powered by credit data, income verification, and proprietary rules.

**End-to-End Legal Management**

We manage the eviction from initial notice to property recovery. Attorney fees included.

HOW WE MAKE MONEY

Simple, Scalable Premium Model.

Landlords or tenants pay an annual premium of 4%–10% of annual gross rent for 12 months of full coverage. Pricing adjusts based on tenant creditworthiness and market risk parameters.

On a \$2,000/mo rental at 5% → **\$1,200/year** per policy. At 1,000 active policies → **\$1.2M ARR**.

**B2B2C via Brokers**

Real estate agents earn a referral fee, making them active distribution partners.

**B2B Direct**

Multi-family operators and REITs sign portfolio agreements with volume pricing.

**B2C Direct**

Individual landlords apply online. Lowest CAC via SEO and word-of-mouth.
